SUMMARY

Motivated Computer Science undergraduate with hands-on experience in full-stack development, machine learning, and Data Structures & Algorithms (DSA). Strong problem-solving skills demonstrated through competitive coding, national-level hackathons, and real-world AI projects. Published IEEE research author with experience in building scalable applications, predictive models, and intelligent software solutions. Passionate about leveraging software engineering and AI to solve real-world problems.

EDUCATION

Examination	Majors	Institute	Year	CPI/%
B-Tech	CSE	B V Raju Institute of Technology	Aug 2023	7.96
PUC	MPC	Aditya junior college	Jun 2021 - 2023	88.6%
Matriculation	SSC	Bhashyam EM high School	Jun 2021	10

SKILLS

- **Programming Languages:** Java, Python, C,HTML,CSS,SQL.
- **Tools:** Git,GitHub, VS Code, Google Colab, Canva,Jupyter notebook ,Vercel,Firestore Database.
- **Soft Skills:** Team Management, Leadership, Strong Communication skills, Networking

ACHIEVEMENTS

- **Paper Published at IEEE Conference - ICSCSA 2025 September 2025 []**
IEEE Conference @ Dhirajlal Gandhi College of Technology, Salem, India
 - Published a research paper in the 5th International Conference on Smart Computing, Systems and Applications (ICSCSA 2025), held from 04–06 August 2025, indexed in IEEE Xplore (DOI: 10.1109/ICSCSA66339.2025.11170777)
- **Vyoma 2k25 Hackathon** April 2025 
Conducted by BVRIT
 - Secured 🏆 2nd Place in the Sustainability & Green Tech Track at Vyoma Hackathon for developing an eco-focused technology solution

CERTIFICATIONS

- **Cisco:** CPA: Programming Essentials in C++
- **MentorX – T-Hub:** AIML, Entrepreneurship Workshop
- **NPTEL:** The Joy Of Computing Using Python, Programming in Java,soft skills
- **Swecha Telangana-** Certificate of completion 4-week summer ai internship

MY WORK

- **Crop Yield Prediction using Machine Learning | Academic Project April 2026**
Tools: Python, Scikit-learn, Pandas, Matplotlib, Jupyter, Git.
 - Developed a machine learning-based crop yield prediction system using agricultural data, applying Random Forest and XGBoost models for accurate yield estimation and data-driven decision support
- **ResNet50 Model For Liver Tumor Classification | Academic Project** May 2025 
Tools: VS Code, Tensor Flow, Scikit, DL.
 - Developed an AI-powered liver tumor classification system using a fine-tuned ResNet50 model on CT images for accurate binary diagnosis.
- **Smart Mess Management System | Full Stack Project April 2026**
Tools: HTML5, JavaScript, Tailwind CSS, Firebase, Nginx.
 - Developed a full-stack mess management application with secure authentication, real-time database synchronization, and QR-based meal verification
 - Implemented meal booking, tracking, automated no-show detection, and penalty management to improve operational efficiency

EXPERIENCE

- **Internship @VISWAM.AI, IIIT Hyderabad** May 2025 
AI Developer Intern – Summer of AI 2025
 - Gained hands-on experience in Python, collaborative software development, and AI model fine-tuning by working with a dedicated team on real-world data-driven AI applications.
